## FACTS AND FIGURES.

The three tables laid before the councils a short time ago by Minister Damon are, upon careful perusal, strongly suggestive that the material interests and large investments held almost exclusively by foreigners, chiefly American residents in Hawaii, must cut a prominent and decided figure in the settlement of the future form of government for these islands. The tables referred to do not represent the entire wealth of the country, but such a large proportion of it that conclusions drawn therefrom will be approximately correct and applicable to the whole of the vested interests of Hawaii.

Space will only allow a general summary of the totals of these clear and suggestive tables; but even such a statement carries on its face food for political as well as financial thought. Each table is complete in itself, and, for the sake of brevity, will be summarized so as to place the results immediately before the eye.

The first table contains a detailed list of Hawaiian sugar plantation corporations, showing the investments therein, together with the nationality of stockholders in each company. The table was compiled during the month of June, 1893, from the latest official returns. This table represents forty sugar companies, with capital stock aggregating \$28,224,300, of which \$27,964,290 has been issued. The following is a summary of amounts invested by nationalities:

American.....	\$18,594,695
Hawaiian-born American.....	2,960,280
American half-caste.....	88,900
British.....	4,303,218
Hawaiian-born British.....	196,200
British half-caste.....	160,098
German.....	1,233,935
Hawaiian-born German.....	39,165
German half-caste.....	2,058
Native Hawaiian.....	38,991
Chinese.....	259,700
Chinese and Portuguese half-caste.....	34,000
Portuguese.....	49,500
Other foreigners.....	3,500

The second table contains a detailed statement embracing forty-three Hawaiian corporations, other than sugar plantations, showing the amounts of the investments with the nationality of the stockholders. This table represents the bulk of the mercantile interests of the Hawaiian islands, represented by a capital stock of \$6,150,705, of which \$5,877,400 has been issued. The following is a summary of the amounts invested by nationalities:

American.....	\$2,690,994
Hawaiian-born American.....	948,197
American half-caste.....	33,473
British.....	1,289,520
Hawaiian-born British.....	233,006
British half-caste.....	201,639
German.....	299,523
Hawaiian-born German.....	28,839
German half-caste.....	4,701
Native Hawaiian.....	51,620
Chinese.....	44,640
Chinese and Portuguese half-caste.....	36,763
Portuguese.....	420
Other foreigners.....	13,565

The third table contains a detailed list of twenty-two firms and partnerships representing sugar plantations and planting interests, not incorporated, compiled from agents' latest reports to June, 1893. The estimated value of these interests is \$3,000,000, held and controlled by the following nationalities:

American.....	\$ 415,000
Hawaiian-born American.....	500,000
British.....	1,195,000
German.....	515,000
Norwegian and Portuguese.....	375,000

The corporations and firms represented by these tables aggregate a capital stock of \$37,375,005, which, summarized by totals, gives the following suggestive result:

American.....	\$21,709,889
Hawaiian-born American.....	4,408,477

American half-caste.....	122,373
British.....	6,787,738
Hawaiian born British.....	429,206
British half-caste.....	391,737
German.....	2,048,458
Hawaiian-born German.....	68,004
German half-caste.....	6,759
Native Hawaiian.....	90,611
Chinese.....	301,340
Portuguese.....	49,920
Norwegian.....	375,000
Other foreigners.....	17,065

There is no guess work about these figures; they are all of record and constitute a plain statement of the investments by nationalities in the bulk of our commercial and agricultural industries up to date. Out of thirty-seven millions, Americans and Hawaiian-born Americans represent over twenty-six million dollars; while pure Hawaiians are represented with a paltry ninety thousand dollars, which, added to the investments of half-castes, barely suffices to raise the amount to half a million dollars.

These figures are in exact keeping with the statements published in this paper heretofore, that the native Hawaiian pays less than one-seventh of the taxes, owns not more than a sixteenth of the land of the islands, while, up to the present time, he has held two-thirds of the paid offices under the government. At the same time it must not be forgotten that the natives represent 70 per cent. of the voters, and have proved themselves incapable at all points of carrying out an enlightened and progressive system of government, such as the advancement of our island civilization now imperatively demands.

## WISE AND OTHERWISE.

Paul Neumann's open letter to President Dole does not seem to have had the expected effect. The Bulletin apologizes for the letter in a sort of half-hearted way, in which it declares Mr. Neumann's intentions were of the best and that he "meant in all kindness to save the personalities of President Dole and his some highly-respected coadjutors from the humiliating consequences" alleged to be awaiting the establishment of good, economical government in Hawaii. A "valued correspondent" has a somewhat livelier appreciation of the absurdity of Mr. Neumann's letter, and does not hesitate to call the grand old fee-taker a political chump.

President Cleveland has consented to act as arbitrator between Argentine and Brazil in their dispute for the possession of the state of Panama, and some of the unkind republican journals declare, that if it takes the president as long to make up his mind as in the Hawaiian affair the weeds are apt to be mighty high in the state of Panama before the dispute is settled.

The effect of the bounty on sugar production in the United States has been very stimulating to the industry there. Since the bounty law went into effect the production of domestic sugars has largely increased, and last year reached 378,000,000 pounds. This includes cane, beet, sorghum and maple sugars.

Charles H. Hoyt has lately written a new play called "The Milk-White Flag," which scores the citizen soldiery of the United States. In Hawaii the "milk-white flag" represents the plain ordinary citizen, who eats poi without the aid of a uniform and thereby avoids unkind comment.

## TWO SAMPLE ROYALISTS.

## Spreckels' Boy Has Caught Papa Nordhoff's Malady.

"Already" said Mr. Nordhoff, "their adherents are beginning to fall away from them and the end is near. There is only one thing that can save the islands, and that is the return of Liliuokalani to the throne. In the future I guess she will behave herself."

"The discontents are the members of the old missionary party, that is, they are descendants of the missionaries. For a time some of the planters joined with them, but the latter have gone back to the queen. They need cheap labor, and would be apt to lose it if the United States took possession."

"Just before we left a sailing vessel arrived in port bringing with her a copy of the Bulletin, containing the recent remarks of President Cleveland on the subject. They were construed to mean that annexation would not take place, and immediately there was a wild scene. The natives

cheered, bonfires were built and the bands paraded the streets. The Provisional government is dead broke, and its end is near."

In a brief conversation on the steamship this morning Mr. Spreckels stated that the annexationists had given up hope, and that the end of the movement was near. "Some of the leaders," said Mr. Spreckels, "will have to flee the country in a short time, and eventually the queen will be restored."

"Her return is not only awaited anxiously by the natives, but also by the planters. Annexation means the ruin of every sugar planter on the islands, as it means good-bye to cheap labor. Without cheap labor sugar cannot be grown with any profit."

"The annexationists have not got a cent, and they will never be able to get the loan they are trying for. In order to do so they will have to call an election, and an election will mean their overthrow. The only man in the party who has any means is Samuel M. Damon, the minister of finance. Evidently he does not intend to be held responsible for the debts of the government, for he is mortgaging his real estate, and turning all his property in cash and other securities easily carried. President Dole has not got a cent."

"Regarding that subsidy to the Oceanic Steamship Company, which you say Consul Wilder has given out is liable to be taken from us. I have only this to say: There was a special enactment passed giving us that, and it was voted for by the citizens of the islands. To take it from us and give it to another company would require a similar vote, and that they could never obtain. As far as the subsidy is concerned, however, I may say that it has not been paid now for three months, simply because the government has got no money."—S. F. Bulletin.

## \$2,000,000 a Year for the British Navy.

Lord Brassey in his "Naval Annual" for 1893, emphasizes the importance to Great Britain of maintaining a fleet sufficiently strong to effectively protect the British merchant navy whenever such a necessity may arise, and points out that such strength can only be gauged by comparison with that of the war vessels possessed by other powers. He thinks that an annual expenditure of \$12,000,000 would certainly not be excessive for the British navy.

3413-14 AUCTIONEER.

## 307

July 10, 1893.

There is a season in the year when most dealers are out of certain lines of stock; we get out occasionally, but we fill up as quickly as most people. For instance we've had to dis-appoint some customers for table cutlery, but now we have all that is required, and of the very best quality. We have also filled up short lines of the celebrated "2196" Haviland, an article that never grows old.

So many people here like hashed meat that we have imported a new style and very good meat cutter that must win the admiration of the celestial who acts as manager of the culinary department of your house. And when you are thinking of something for the kitchen, think again and get a tin of Putz polish that will brighten up every kind of metal. The water taps, that usually get dirty with age can be polished with Putz liquid so they will be as bright as gold.

Individuals who need something to sharpen their wits or their razors on can find nothing better for the purpose than one of Emerson's Razor Strops. They are the best in use and sell very cheap.

We neglected to mention in our notice of Haviland China that our stock now contains an assortment of chocolate pots such as are used in every house where people like to drink chocolate.

If any of our readers are admirers of works of art, their attention is called to a very excellent water color sketch by the late R. C. Barnfield in our makai window. It is an island view and has been pronounced by judges to be one of the late artist's best.
